INSTRUMENT TRAINING AND INSTRUCTION

To insure that the equipment remains in good working order and for the safety of the users, it is absolutely required that every user be trained and checked out on a given piece of equipment before he or she is allowed to use it.

Tutorials will be provided as requested. A charge $130.00 per hour will apply for CU/NIST users and $225 per hour for non-CU users. Sessions will be limited to 4 students.

Users who have achieved very high levels of proficiency on a given instrument will be allowed to train and check out other users from their own groups on a specific instrument. Such "super" users must be so designated by the Keck Lab Manager.

SAFETY TRAINING AND INSTRUCTION

The JILA Clean Room Safety Module, required of all clean room users, and Chemical Safety Module, required of all who intend to use chemicals, and corresponding quiz can be obtained from the clean room manager, JILA Reception, or online at: http://jila-kecklab.colorado.edu/forms.html. Completed quizzes are to be returned to the lab manager or JILA Reception.

The Environment Health and Safety Lab Safety and Hazardous Waste Generation training and quiz, required of anyone intending to use chemicals on the UCB campus, can be found at: http://ehs.colorado.edu/training/hazardous-waste-generator-instruction. Email the completed quiz to: chemsafety@colorado.edu

A clean room walk-through will be conducted at the time access credentials are given.
