

Training and Instruction

Instrument Training and Instruction

To ensure that the equipment remains in good working order and for the safety of the users, it is required that every user be trained and checked out on each piece of equipment before they are allowed to use it.

Tutorials will be provided as requested. A charge \$135 per hour will apply for JILA/CU/NIST users and \$250 per hour for non-CU users. Sessions will be limited to 3 students.

Users who have achieved very high levels of proficiency on a given instrument will be allowed to train and check out other users from their own groups on a specific instrument. Such users must be designated by the Keck Lab Manager.

Safety Training and Instruction

Completion of the JILA Clean Room Safety Module is required for all clean room users. Completion of the JILA Chemical Safety Module and Quiz is required for all who intend to use chemicals.

The EH&S Lab Safety and Hazardous Waste Generation training and quiz is required for anyone intending to use chemicals on the UCB campus.

A clean room walk-through will be conducted at the time access credentials are given.
